

Eric Le

AI Engineer

✉ me@erclx.dev 📞 +46 73 970 87 91 🌐 erclx.dev 📄 erclx 🏠 erclx 📍 Gothenburg, Sweden

Profile

AI engineer with 18 months at Volvo Technology, where I built a plain-language query agent over truck test data and took it from my master's thesis to the team's data platform. Since December 2025 I have published my own tools on npm, the VS Code Marketplace, and the Chrome Web Store. MSc in Complex Adaptive Systems and BSc in Engineering Physics from Chalmers University of Technology.

Professional Experience

Associate Data Scientist

Nov 2024 – Jun 2025

Volvo Technology, Gothenburg

- Rebuilt the test-data agent into a multi-step SQL pipeline with session memory, on an agent framework I wrote over LangChain.
- Connected it to PostgreSQL, Excel, and a Trino data lake inside the team's data platform.

Technologies: Python, LangChain, OpenAI, PostgreSQL, S3, Kubernetes, Streamlit

Applied AI Intern

Jun – Sep 2024

Volvo Technology, Gothenburg

- Deployed the thesis plotting agent and prototyped its SQL successor.
- Presented the agent at Generative AI for Automotive USA 2024, an industry conference in Ann Arbor.

Technologies: Python, lagent, Mixtral-8x7B, CodeLlama-34B, Llama 3.1 70B, Streamlit, SQL

Master's Thesis

Jan – Jun 2024

Volvo Technology, Gothenburg

- Built an agent that let engineers request plots and statistics from test data in plain language, with no analysis code to write.

Technologies: Python, lagent, Mixtral-8x7B, CodeLlama-34B, Streamlit

Generative AI Intern

Jun – Aug 2023

Bac Ha Software, Hanoi

- Reproduced published GAN architectures for image generation and image-to-image translation, and trained them on GPU.

Technologies: Python, TensorFlow, Generative Adversarial Networks (GANs)

Projects

canon, AI Development Toolkit

Jan 2026 – Present

npm · GitHub

- Built an agent-first CLI and Claude Code plugin for running AI-assisted development across repositories, distributing rules and skills from one source and coordinating parallel agent sessions through an orchestrator, planner, and worker split. Published on npm as @erclx/canon, with a live build at canon.erclx.dev.

Technologies: TypeScript, Bun, Bash, Claude Code, GitHub Actions

annex, EU AI Act Compliance Agent

Sep 2026

Recorded demo · GitHub

- Compared full-context reading, vector search, and graph traversal over the EU AI Act on the same twelve-question set. Built an agent that returns article-level citations and declines to infer where the text is inconclusive.

Technologies: Python, LangGraph, local LLM, vector search, knowledge graphs

Jobtriage, Web Application
Live demo · GitHub

- Built a job-search application over Sweden's public JobTech APIs, with a React Flow canvas for triage, timelines, comparisons, and shortlists. A live demo is available, and visitors can use their own key with Anthropic, OpenAI, Gemini, or local Ollama.

Technologies: TypeScript, Next.js, Vercel AI SDK, React Flow, Python, FastAPI, SQLite, Cloud Run

May 2026

Caret, Chrome Extension
Chrome Web Store · GitHub

- Keeps a prompt library one keystroke away in Claude, Gemini, and ChatGPT, with trigger-symbol search and keyboard-driven injection. Published on the Chrome Web Store.

Technologies: TypeScript, React, Chrome Extension API, Vite, GitHub Actions

Mar – Apr 2026

Stackr, VS Code Extension
VS Code Marketplace · Open VSX · GitHub

- Gathers scattered files into one prompt-ready block, with drag-and-drop staging, live token counting, and pinned files that survive session restarts. Published on both the VS Code Marketplace and Open VSX.

Technologies: TypeScript, VS Code Extension API, Node.js, GitHub Actions

Dec 2025 – Jan 2026

Education

MSc in Complex Adaptive Systems
Chalmers University of Technology, Gothenburg

2022–2024

BSc in Engineering Physics
Chalmers University of Technology, Gothenburg

2019–2022

Languages
